Robots and AI: Illusions and Social Dilemmas Daniel Albiero, 2022-03-18 This book aims to critically assess the Cartesian stance that affirms robotic and AI technologies as candidates to supplant human capacities in non-routine

intellectual nature activities based on social power relations. In the argumentation listed, the contradictions that this hypothesis approaches will be exposed, mainly in a historical and social analysis based on a complex and uncertain sociological perspective, added by a discussion within the scope of the Chaos theory. Finally, an outline of the current era, fostered by extremisms and extremists, will be described in terms of its contradictions in an attempt at sociological analysis. For this, some crucial and unsettling questions will be asked, and an effort to come up with answers will be made for some.

Histories of Medicine and Healing in the Indian Ocean World, Volume Two Anna Winterbottom, Facil

Tesfaye, 2016-01-26 The Indian Ocean has been the site of multiple interconnected medical interactions that may be viewed in the context of the environmental factors connecting the region. This interdisciplinary work presents essays on various aspects of disease, medicine, and healing in different locations in and around the Indian Ocean from the eighteenth century to the contemporary era. The essays explore theoretical explanations for disease, concepts of fertility, material culture, healing in relation to diplomacy and colonialism, public health, and the health of slaves and migrant workers. This book will appeal to academics and graduate students working in the fields of medical and scientific history, as well as in the growing fields of Indian Ocean studies and global history.

Geomorfologia Antonio Christofolatti, 1988 Objetivando estudar as formas de relevo, a Geomorfologia possui função relevante no contexto das geociências. Atuando sobre o embasamento rochoso, os processos morfogenéticos modelam a topografia terrestre, em cujo campo também interferem as forças geodinâmicas da Terra. Estabelecendo a focalização sistêmica, esta obra trata sucessivamente dos processos e das formas das vertentes, das características das bacias hidrográficas e das redes fluviais, da morfologia litorânea e da morfologia cárstica. No capítulo final, apresenta panorama sobre as diversas teorias geomorfológicas.

Herbicides Andrew Price, Jessica Kelton, Lina Sarunaite, 2015-12-02 Herbicides are one of the most widely used groups of pesticides worldwide for controlling weedy species in agricultural and non-crop settings. Due to the extensive use of herbicides and their value in weed management, herbicide research remains crucial for ensuring continued effective use of

herbicides while minimizing detrimental effects to ecosystems. Presently, a wide range of research continues to focus on the physiology of herbicide action, the environmental impact of herbicides, and safety. The authors of *Herbicides, Physiology of Action, and Safety* cover multiple topics concerning current valuable herbicide research.

Handbook of Research on the Conservation and Restoration of Tropical Dry Forests Bhadouria, Rahul, Tripathi, Sachchidanand, Srivastava, Pratap, Singh, Pardeep, 2019-09-27 Tropical dry forests are the most exploited and endangered ecosystems in the world. A combination of climatic and human factors often reduce these forests to patches of dry scrubs or savannas. Because these ecosystems experience a more arduous and less anticipated environment, they are more prone to environmental stress as plant communities are developed. Therefore, urgent research is necessary to understand both the detrimental issues and problem-solving approaches to conserving these important forests. The *Handbook of Research on the Conservation and Restoration of Tropical Dry Forests* is a pivotal reference source that combines theory and practice on the current trends and issues in this important ecological subject and discusses future challenges towards conservation strategies of these tropical dry forests. While highlighting topics such as forest management, natural regeneration, and silviculture, this publication examines the anthropogenic impacts on tropical dry forests and the necessity to rebuild their ecosystems. This book is ideally designed for state forest agency professionals, resource managers, non-governmental organization agents, ecologists, botanists, environmentalists, students, and researchers seeking current research on the threats to these forests.

Research Anthology on Ecosystem Conservation and Preserving Biodiversity Management Association, Information Resources, 2022-04-08 In today's rapidly evolving world, it has never been more critical to consider key environmental issues such as climate change, pollution, and endangered species. Society faces an unknown future where the fate of the environment is continuously in flux based on current preservation initiatives that governments develop. In order to ensure the world is protected moving forward, further study on the importance of securing environments, ecosystems, and species is necessary to successfully implement change. The *Research Anthology on Ecosystem Conservation and Preserving Biodiversity* considers the best practices and strategies for protecting our current ecosystems as well as the potential ramifications of failing to implement policies. Society is at a crossroads where if we continue to ignore the danger and warning signs brought about by environmental issues, we will be unable to maintain a healthy environment. Covering essential topics such as extinction, climate change, and pollution, this major reference work is ideal for scientists, industry professionals, researchers, academicians, policymakers, scholars, practitioners, instructors, and students.
